Hi

Did Lukhanyo have a diarrhea poop this morning? Or was it normal?

Also did he bump his lip?

Good day

Kwakho didn't notice much to worry about with consistency but the color, so maybe that's indicative of the diarrhoea. I don't know.

As for the bump, he didn't cry spontaneously nor while playing to signal being hurt. The 3 boys and Mila however do get active so a bump and fall are always possible, but I did not see him incurring any incident that could explain the lip.

Regards,  
Salatiso
